

Carr-Cup® is a revolutionary and maintenance free cup system to mix and spray varnish. Work faster, more efficiently and with greater productivity. Moreover, you can count on a flawless finish.

Solid cup

Mixing and spraying with one cup
Direct mounting on gun
Changing colour in seconds

Airtight cap

Paints do not dry out when stored
Ideal for reuse

Convenient screw fit lid

Instantly open and close
without paint residue

Direct paint supply

Prevents blockages
and paint residues

Integrated paint filter

Clean and dust-free paint
125 µm or 190 µm filter

Resealable dispenser box

Dust remains outside
the spray booth

Disposable Material

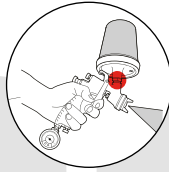

No old paint residue
No cleaning required

CARR-CUP®

CARR-CUP.COM

Exceptional user-friendliness

No need for an outer cup anymore, because the sturdy cup can be mounted directly on the spray gun. Mixing and spraying? All in just one cup. Colours can even be changed in seconds.

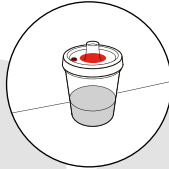

No blockages

The spout on the Carr-Cup cover is completely free of obstructions, which ensures a direct and smooth paint supply.

Tight spray pattern

Thanks to the built-in air pressure valve, air pressure differentials are automatically controlled. This ensures an optimal and uniform spray pattern.

Clean and dust-free paint

Via the integrated paint filter - with a 125 µm or 190 µm mesh - the clear coat is immediately applied to the surface. This ensures no dust particles in your paint.

Suitable for storing paint

The airtight cap ensures that the paint does not dry out when storing leftover paint. Place the cup upside down to keep the filter moist. Ideal for reuse.

Ideal for reuse

Instantly open and close
Thanks to the sophisticated design of the lid, the cup can be turned in no time at all. This extreme user-friendliness doesn't end here!

No cleaning

After use, simply dispose of the cup system. This will not only save cleaning time, but also the cost of detergents and solvents.

Packed dust-free

The Carr-Cup sets are individually packed, in a resealable dispenser box. This ensures that dirt and dust remain outside the spray booth at all times.
